RE: Red Rock Mine  
Wastewater System

Dear Mr. Groff:

Enclosed herewith please find a copy of an undated letter this day received from Steven R. McNeal of the Division of Environmental Health, addressed to you at Box 414, Moab, Utah.

If you recall we had a water analyses made by a concern in Denver, Colorado. Apparently the Department of Environmental Health finds the analyses incomplete. It was my understanding that we were to get a supplemental report from the firm in Colorado that did the initial analysis; however, it is also my understanding that despite our request this information has not been furnished.

At your suggestion I inquired of the State who they would consider to be properly equipped to provide an analyses of the water taken from the mine. The enclosed letter states that Ralph Helfer of the State Health Laboratory, 44 Medical Drive, Salt Lake City, Utah 84113, phone 533-6131, could provide information on the State Health Laboratory analyses capability and cost for these parameters. I suggest to you that you contact Mr. Ralph Halfer immediately and furnish him with whatever water samples may be necessary and request him to prepare the analyses for submittal to the Department of Health.

Sincerely,

Robert H. Ruggeri
